The table below provides information on the scallop observer program, including calls, observer assignments, and achieved coverage levels for trips landing from July 1, 2012, to July 31, 2012. The data includes details for various access areas and categories, such as Limited Access and General Category LA. The table uses percentages to indicate achieved coverage, with a target coverage column for comparison. The data is intended to reflect the best available information, with final numbers subject to adjustment by the NMFS NE Regional Office to account for any errors or misclassified trips. The data is divided into closed access areas, general categories, and an open area, each with specific coverage targets and observed coverage percentages.
