

Here are a few more details for the monkfish meeting on Monday and Tuesday of next week.

1. The draft assessment document distributed on Tuesday April 2nd has an interesting property by which the label axes on some graphs were dropped during the conversion between Word.docx and Adobe.pdf. I have created a directory on a public website that has the original pdf along with the word file for the figures and an appendix that was inadvertently left off the distribution on Tuesday. The ftp website may be accessed at

<http://www.nefsc.noaa.gov/ExternalDrive>

login: pdy

password: popdy

The directory structure should be self explanatory.

2. The meeting will be accessible via Webex and conference line. I don't have the full information yet but the dial in numbers for audio are given below.

[866/836-6169](tel:8668366169) (toll free)

[203/566-4221](tel:2035664221) (toll; for international callers)

Participant code: 5443237

3. Details on the Webex will be emailed tomorrow. Alternatively, a simple way of getting to the NMFS webex site is to use the following link and look for a meeting on monkfish. <https://nmfs-st.webex.com>
