		$	45.0	2.0	43.0	44.0	42.0
131	Aquarium	PP	3	0	3	3	3

Increase:

Need: Nominal increase required to cover increased costs of salaries and materials, and does not allow any expansion of program.

Additional positions: None

Program:

Objective: To provide facilities for the holding of various types of marine life for experimental purposes and to maintain in aquarium tanks for public display a representative group of fish and invertebrates of the Woods Hole region, and to provide a series of exhibits describing research in fishery biology and oceanography.

Accomplishments FY 1963: Success was achieved in holding a number of fish alive for one year, some for over two years, which provided biologists experimental material never before available.

The public part of the Aquarium was visited by more than 200,000 persons during the summer.

Base of Operation: Woods Hole, Massachusetts
