

Table 15. Annual minimum swept area abundance estimates (number of fish) and CVs for Atlantic sturgeon during the spring and fall from the Northeast Area Monitoring and Assessment Program survey. Estimates provided by Dr. Chris Bonzek, Virginia Institute of Marine Science.

Year	Fall		Spring	
	Number	CV	Number	CV
2007	6,981	0.015		
2008	33,949	0.322	25,541	0.391
2009	32,227	0.316	41,196	0.353
2010	42,164	0.566	52,992	0.265
2011	22,932	0.399	52,840	0.48
2012			28,060	0.652
