

Figure 6.16.2.3. Median number (panels on the left) and median proportion (panels on the right) of smolts killed during emigration due to direct and indirect cumulative mortality associated with dam passage across the 15 modeled hydroelectric dams in generations 1–10. Medians (circles) and twenty-fifth to the seventy-fifth percentiles (lines) are shown for all adults that unsuccessfully attempt to pass an individual dam spawning in the production unit (PU) immediately below the impassable dam, for adults being evenly distributed in all PUs below the impassable dam, and the base (top to bottom, respectively) under the Recovery scenario.
