

NOAA Outreach and Education on Protected Species: Atlantic Salmon

Name \_\_\_\_\_

1. Describe the method you used to bypass the dam.
2. Did you have to do anything different for the fish going upstream versus downstream?
3. How might these changes affect the output of the turbines?
4. How many fish do you think made it by the dam successfully after your changes versus before?
5. How do these engineering changes help us with salmon conservation?
