Northeast Fisheries Science Center Reference Documents

This series is a secondary scientific series designed to assure the long-term documentation and to enable the timely transmission of research results by Center and/or non-Center researchers, where such results bear upon the research mission of the Center (see the outside back cover for the mission statement). These documents receive internal scientific review, and most receive copy editing. The National Marine Fisheries Service does not endorse any proprietary material, process, or product mentioned in these documents.

All documents issued in this series since April 2001, and several documents issued prior to that date, have been published electronically. To access the electronic version of a document in this series, go to http://www.nefsc.noaa.gov/nefsc/publications/. The electronic version is available in PDF format to permit printing of a paper copy directly from the Internet. If you do not have Internet access, please contact the senior Center author of the desired document. Refer to the title page of the document for the senior Center author’s name and mailing address. If there is no Center author, or if there is corporate (i.e., non-individualized) authorship, then contact the Center’s Woods Hole Laboratory Library (166 Water St., Woods Hole, MA 02543-1026).

Information Quality Act Compliance: In accordance with section 515 of Public Law 106-554, the Northeast Fisheries Science Center completed both technical and policy reviews for this report. These predissemination reviews are on file at the NEFSC Editorial Office.

# TABLE OF CONTENTS

EDITORIAL NOTES ..............................................................................................................iv
PUBLICATIONS ................................................................................................................1
REPORTS ..........................................................................................................................10
ABSTRACTS/PRESENTATIONS .......................................................................................14
EDITORIAL NOTES

The following bibliography consists of three sections: (1) anonymously peer-reviewed publications (“publications”), (2) transparently peer-reviewed and nonpeer-reviewed publications (“reports”), and (3) abstracts for oral presentations and poster displays. The bibliography covers works with a 2015 publication or presentation date, prepared by Northeast Fisheries Science Center (NEFSC) employees. (Publications appearing “online first” in 2015 but with a 2016 print publication are not included in this list.) Bibliographies of publications, reports, and abstracts for earlier years are available online at: http://nefsc.noaa.gov/publications/lists/.

Availability varies for each work. Web links to online publications and Digital Object Identifiers (DOI) are provided when possible.

Editorial treatment of bibliographic entries is based on the Council of Science Editors style manual, seventh edition. ¹

PUBLICATIONS

REPORTS

Cole TVN, Henry AG. 2015. Serious injury determinations for baleen whale stocks along the Gulf of Mexico, United States east coast and Atlantic Canadian provinces, 2008-2012. NEFSC Ref Doc. 15-05; 43 p, doi: 10.7289/V5VD6WDD.

Henry AG, Cole TVN, Hall L, Ledwell W, Morin D, Reid A. 2015. Serious injury and mortality determinations for baleen whale stocks along the Gulf of Mexico, United States East Coast and Atlantic Canadian Provinces, 2009-2013. NEFSC Ref Doc. 15-10; 48 p, doi: 10.7289/V5C53HTB.

Northeast Fisheries Science Center. 2015. 60th Northeast Regional Stock Assessment Workshop (60th SAW) assessment report. NEFSC Ref Doc. 15-08; 881 p, doi: 10.7289/V5W37T9T.

Northeast Fisheries Science Center. 2015. 60th Northeast Regional Stock Assessment Workshop (60th SAW) assessment summary report. NEFSC Ref Doc. 15-07; 36 p, doi: 10.7289/V5D21VKV.

ABSTRACTS/PRESENTATIONS

McBride RS. 2015. To measure is to know: Examples of variable or revised spawning rates by four species from boreal to tropical marine systems [abstract]. Presented at: American Fisheries Society 145th Annual Meeting; 16-20 Aug 2015; Portland OR.

Sheehan TF, Renkawitz MD, Smith B. 2015. All prey are not created equal [abstract]. Presented at: American Fisheries Society 145th Annual Meeting; 16-20 Aug 2015; Portland OR.

Sugano CS, McCorkle DC, Cohen AL, Milke LM. 2015. The effects of food supply and elevated pCO2 on the early development of the bay scallop (Argopecten irradians) [abstract].

Veilleux DJ, Milke L. 2015. Comparison of growth and survival of the larval eastern oyster (Crassostrea virginica) fed by different methods [abstract]. Presented at: Joint Meeting of the Northeast Aquaculture Conference and Exposition (NACE) and the 35th Milford Aquaculture Seminar; 14-16 Jan 2015; Portland ME. J Shellfish Res. 34(2):723.

Wikfors GH. 2015. New insights into the development and function of hemocyte types in oysters [abstract]. Presented at: Joint Meeting of the Northeast Aquaculture Conference and
Exposition (NACE) and the 35th Milford Aquaculture Seminar; 14-16 Jan 2015; Portland ME. J Shellfish Res. 34(2):726.

Procedures for Issuing Manuscripts in the Northeast Fisheries Science Center Reference Document (CRD) Series

Clearance

All manuscripts submitted for issuance as CRDs must have cleared the NEFSC’s manuscript/abstract/webpage review process. If any author is not a federal employee, he/she will be required to sign an “NEFSC Release-of-Copyright Form.” If your manuscript includes material from another work which has been copyrighted, then you will need to work with the NEFSC’s Editorial Office to arrange for permission to use that material by securing release signatures on the “NEFSC Use-of-Copyrighted-Work Permission Form.”

For more information, NEFSC authors should see the NEFSC’s online publication policy manual, “Manuscript/abstract/webpage preparation, review, and dissemination: NEFSC author’s guide to policy, process, and procedure,” located in the Publications/Manuscript Review section of the NEFSC intranet page.

Organization

Manuscripts must have an abstract and table of contents, and (if applicable) lists of figures and tables. As much as possible, use traditional scientific manuscript organization for sections: “Introduction,” “Study Area” and/or “Experimental Apparatus,” “Methods,” “Results,” “Discussion,” “Conclusions,” “Acknowledgments,” and “Literature/References Cited.”

Style

The CRD series is obligated to conform with the style contained in the current edition of the United States Government Printing Office Style Manual. That style manual is silent on many aspects of scientific manuscripts. The CRD series relies more on the CSE Style Manual. Manuscripts should be prepared to conform with these style manuals.

The CRD series uses the American Fisheries Society’s guides to names of fishes, mollusks, and decapod crustaceans, the Society for Marine Mammalogy’s guide to names of marine mammals, the Biosciences Information Service’s guide to serial title abbreviations, and the ISO’s (International Standardization Organization) guide to statistical terms.

For in-text citation, use the name-date system. A special effort should be made to ensure that all necessary bibliographic information is included in the list of cited works. Personal communications must include date, full name, and full mailing address of the contact.

Preparation

Once your document has cleared the review process, the Editorial Office will contact you with publication needs – for example, revised text (if necessary) and separate digital figures and tables if they are embedded in the document. Materials may be submitted to the Editorial Office as email attachments or intranet downloads. Text files should be in Microsoft Word, tables may be in Word or Excel, and graphics files may be in a variety of formats (JPG, GIF, Excel, PowerPoint, etc.).

Production and Distribution

The Editorial Office will perform a copy-edit of the document and may request further revisions. The Editorial Office will develop the inside and outside front covers, the inside and outside back covers, and the title and bibliographic control pages of the document.

Once the Web version of the CRD is ready, the Editorial Office will contact you to review and submit corrections or changes before the document is posted online.

A number of organizations and individuals in the Northeast Region will be notified by e-mail of the availability of the document online.
Publications and Reports of the Northeast Fisheries Science Center

The mission of NOAA’s National Marine Fisheries Service (NMFS) is “stewardship of living marine resources for the benefit of the nation through their science-based conservation and management and promotion of the health of their environment.” As the research arm of the NMFS’s Northeast Region, the Northeast Fisheries Science Center (NEFSC) supports the NMFS mission by “conducting ecosystem-based research and assessments of living marine resources, with a focus on the Northeast Shelf, to promote the recovery and long-term sustainability of these resources and to generate social and economic opportunities and benefits from their use.” Results of NEFSC research are largely reported in primary scientific media (e.g., anonymously-peer-reviewed scientific journals). However, to assist itself in providing data, information, and advice to its constituents, the NEFSC occasionally releases its results in its own media. Currently, there are three such media:

**NOAA Technical Memorandum NMFS-NE** -- This series is issued irregularly. The series typically includes: data reports of long-term field or lab studies of important species or habitats; synthesis reports for important species or habitats; annual reports of overall assessment or monitoring programs; manuals describing program-wide surveying or experimental techniques; literature surveys of important species or habitat topics; proceedings and collected papers of scientific meetings; and indexed and/or annotated bibliographies. All issues receive internal scientific review and most issues receive technical and copy editing.

**Northeast Fisheries Science Center Reference Document** -- This series is issued irregularly. The series typically includes: data reports on field and lab studies; progress reports on experiments, monitoring, and assessments; background papers for, collected abstracts of, and/or summary reports of scientific meetings; and simple bibliographies. Issues receive internal scientific review and most issues receive copy editing.

**Resource Survey Report** (formerly Fishermen’s Report) -- This information report is a regularly-issued, quick-turnaround report on the distribution and relative abundance of selected living marine resources as derived from each of the NEFSC’s periodic research vessel surveys of the Northeast’s continental shelf. This report undergoes internal review, but receives no technical or copy editing.

TO OBTAIN A COPY of a NOAA Technical Memorandum NMFS-NE or a Northeast Fisheries Science Center Reference Document, either contact the NEFSC Editorial Office (166 Water St., Woods Hole, MA 02543-1026; 508-495-2350) or consult the NEFSC webpage on “Reports and Publications” (http://www.nefsc.noaa.gov/nefsc/publications/). To access Resource Survey Report, consult the Ecosystem Surveys Branch webpage (http://www.nefsc.noaa.gov/femad/ecosurvey/mainpage/).

ANY USE OF TRADE OR BRAND NAMES IN ANY NEFSC PUBLICATION OR REPORT DOES NOT IMPLY ENDORSEMENT.
